CRANE SOLUTIONS THAT WORK
WHO WE ARE

Wazee, now part of The Timken Company, provides electrical and mechanical solutions to aerospace, manufacturing, municipalities, mining, agricultural, power generation, oil and gas and other heavy industrial customers through our three services divisions: Crane, Electric and Wind.

Wazee Crane is the leading overhead bridge crane manufacturer and hoist supplier in the Rocky Mountain Region. We have a complete manufacturing facility in Broomfield, Colorado with the capability to fabricate simple to complex overhead cranes including welded plate box girders with spans in excess of 100 feet. We have extensive electrical capability as well as AWS certified welders on staff allowing us to service all types of cranes. Additionally, we maintain complete crane parts and crane service departments with highly-trained technicians, on call 24 hours a day.

WHAT WE DO

- Crane Manufacturing
- Load Testing
- Sales and Installation
- Operator Training
- Crane Modernization
- 24/7 Service
- Inspection Services
- Parts and Service

OVERHEAD MATERIAL HANDLING SYSTEMS

- Top and under running, single and double girder cranes
- Custom Cranes
- Runway Systems
- Wire Rope Hoists
- Chain Hoists (manual and electric)
- Monorail Systems (both I-beam and patented track with switches, curves, etc)
- Work Station Crane Systems (free standing and ceiling supported)
- Jib Cranes (wall cantilever, wall bracket, freestanding, and mast type jib cranes)
- Portable Gantry Cranes
- Winches
CUSTOM DESIGN & CRANE MANUFACTURING

Equipment Sales and Manufacturing
Manufactured according to CMAA, ASME, NEC, OSHA, MSHA and ANSI regulations, our cranes are backed by advanced technologies in manufacturing and the highest industry safety standards. With a large selection of major component manufacturers to choose from, we are able to select the right components for each application.

From new cranes to the modernization of existing cranes, our crane solutions and services menu is designed to meet our customers’ needs. Our fabricators and AWS certified welders are dedicated in-house professionals.

In-House Engineering
We provide in-house engineering and furnish PE stamped drawings and calculations, custom generated AutoCAD and general arrangement drawings, and wiring schematics for each crane we build. We also offer custom solid works 3D models complete with FEA and MathCAD calculations and analysis.

SAFETY

We provide the latest equipment, training and certifications to ensure workplace safety. The following product safety options are available to keep your team and facility safe after installation:

- Overload Protection
- Swing Control
- Load Display
- Hoist Monitoring
- Collision Avoidance Systems
- Radio Control Systems
- Audible and Visual Warning Alarms
- Operator Training and Certification

Wazee Protection Program
Keeping up with regular maintenance is an integral part of ensuring a safe workplace. Customized maintenance programs are offered for all types and brands of cranes. A variety of examinations and tests are necessary to diagnose problems and predict maintenance requirements before costly breakdowns and repairs which could compromise safety.
